

BLUE LINE

EO STERILIZATION SERVICES

March 17, 2023

Dear Blue Line Sterilization Services (BLSS) customer,

BLSS is dedicated to serving you by providing high quality sterilization service that meets environmental regulations, including EU Directive 2002/95/EC and subsequent amendments of the European Parliament and of the Council of the use of certain hazardous substances in electrical and electronic equipment (EEE) and REACH (Registration, Authorisation and Restriction of Chemicals, European Union Regulation (EC) 1907/2006). We are making the following information available to assist you in meeting your environmental policies and procedures.

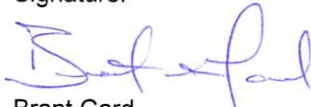

RoHS and REACH Compliance

Blue Line Sterilization Services does not manufacture products, but sterilizes customer products using ethylene oxide (EO) as the fumigant and distilled water to humidify the load during processing. Since neither EO nor water is listed as a chemical of interest for RoHS or REACH, the compliance of products processed at BLSS is not affected by the sterilization process.
